

As a small business owner and commuter between Chicago and Northwest Indiana, which is situated between the most heavily used U.S. highways, I need instant traffic updates. Local A.M. or even F.M. radio does not provide traffic information any less than in 10 minute intervals. As I am traveling I may have only a few minutes to decide which roadway to take to my destination. My business depends on my ability to arrive to my destination on time and as a subscriber to XM radio, I rely on the company's services to provide instant information. It is my right as a paying customer to have this information and should not be jeopardized by government intervention. I strongly urge the FCC to reject the NAB's petition 04-160 and fully support XM radio. Thank you.
